

## Media Services

---

Library and Technology Services offers an extensive media collection and streaming video services for courses. Videos and DVDs are available for viewing and for short-term loan at the Fairchild-Martindale Library.

The Digital Research and Scholarship Team (<https://citl.lehigh.edu/digital-scholarship-team/>) is part of the Library and Technology Services Center for Innovation in Teaching and Learning. The team works with faculty and students in the use of digital tools and technologies that enable them to develop and/or disseminate their coursework and research. Examples of work include documentary audio and video, web publication, and spatial and data visualization. The Digital Media Studio (<https://lts.lehigh.edu/services/digital-media-studio/>), located in the Fairchild-Martindale Library breezeway, houses resources for professional audio and video recording and a Mac computer lab and classroom, equipped with basic and advanced video editing and design software. The lab also loans video, audio, and photography equipment.

Students, faculty, and staff can create high-quality video recordings at the touch of a button, and without any previous video production experience, in two DIY Video Recording Studios (<https://confluence.cc.lehigh.edu/pages/viewpage.action?pageId=53913155>), one located on the 5th floor of Fairchild-Martindale Library, and the other in Building C on Mountaintop Campus (<https://confluence.cc.lehigh.edu/display/LKB/DIY+Video+Recording+Studio+@+Building+C/>). Building C also includes an Audio Recording Studio (<https://confluence.cc.lehigh.edu/display/LKB/Audio+Recording+Studio+@+Building+C/>), where users can easily record quality narrations, voiceovers, interviews and podcasts on their own, and a fully-equipped AR/VR Development Studio (<https://confluence.cc.lehigh.edu/pages/viewpage.action?pageId=99915576>), designed for developers to imagine, create, and build immersive experiences in VR, AR, and MR.
