History majors are uniquely equipped for understanding our ever-changing world and the diversity of the human experience. Our majors study the causes and consequences of change and learn to see the world from the perspectives of others.

As History majors practice the arts of explanation and empathy, they also cultivate a broad set of research, communication, and critical thinking skills. These skills include the location and analysis of texts, data, and evidence; the mastery and synthesis of large bodies of written and visual media; the furnishing of written and oral arguments and descriptions; the evaluation of the arguments of others; and the application of interpretive, quantitative, and digital tools.

Our majors are encouraged to hone all these skills in the process of independent research conducted under faculty guidance, either in the Capstone Experience (HIST 302) or the more ambitious Honors Thesis (HIST 391, 392). They are also encouraged to craft the major to their own particular interests, either by pursuing a geographically broad historical education or by concentrating on a particular region or theme that interests them. Concentrations pursued by our majors include War, Empire, and Revolution; Women, Gender, and Sexuality; Global Connections; Race, Ethnicity, and Diasporas; Religion, Thought, and Culture; Medicine, Technology, and Environment; and Public and Digital History.

In all of these ways, History majors acquire a unique blend of social-scientific and humanistic knowledge. They assemble an unusually wide body of applicable skills and knowledge. These skills serve our students well in an almost limitless variety of careers, from law, education, journalism, and public affairs to business and medicine. Accordingly, the major also positions students well for graduate training in history, law, public policy, business, and medicine. History majors get what they need to thrive in a rapidly changing workplace, to be active and informed citizens, and to cultivate lifelong learning.

Upon the applicant's undergraduate preparation and record, admission to graduate study in history is competitive and dependent on faculty-student interactions. Graduate programs provide access to rare books collections and scholarly periodicals and monographs, especially rich in materials for graduate research in history. Lehigh's libraries are home to the Institute for Eighteenth Century Studies, which sponsors yearly seminars, and the Lawrence Henry Gipson Library, which focuses on the American history, offering a wide range of courses that reflect strengths across the department, including 19th and 20th century U.S. History, Latin American, Caribbean, West African, and African-Diaspora history. Faculty, including museum directors, and public servants. The graduate program has more than seventy years of history. Its graduates have become university and college professors, secondary school teachers and administrators, museum directors, and public servants. The graduate program offers a wide range of courses that reflect strengths across the faculty, including 19th and 20th century U.S. History; Latin American, Caribbean, West African, and Atlantic African-Diaspora history; British, French and Spanish Atlantic World Empires; and African-American history. Course offerings also reflect thematic approaches rather than chronologically; for example, a student may be examined in labor/social history 1800-present, and in political history 1800-present. The department has close ties with the Lawrence Henry Gipson Institute for Eighteenth Century Studies which sponsors yearly symposia and provides research support for both faculty and students. The history of technology program is closely tied to Lehigh's Science, Technology, and Society program. Lehigh's libraries are especially rich in materials for graduate research in history, including a rare books collection and an extensive collection of scholarly periodicals and monographs. Graduate programs provide intensive and specialized study, and the policy of limited enrollment permits close relations between faculty and students.

Besides general requirements for College of Arts and Sciences graduate programs, the following special requirements apply to graduate study in history.

**Master of Arts**

There are two master's programs. Under Plan I, a candidate may earn the degree by successfully completing 27 hours of approved course work and submitting a thesis of the length and quality that would make it suitable for publication as a scholarly article. The paper may be on work presented in a graduate research seminar in the program. Candidates continuing toward a doctorate should select Plan I. Candidates declaring Plan II take 30 hours of approved course work and pass examinations in two fields chosen from American, British, European, and Latin American history, and History of Technology. Candidates in either plan are required to maintain a 3.3 average in all graduate work.

**M.A. in History with Concentration in Public History**

The dissertation advisor will chair a special committee that will oversee the student's graduate program. The other members of the special committee will be those faculty who are examiners in the selected fields and one professor from another department relevant to the candidate's major field. No professor may direct more than one field, but the direction of a field may involve more than one professor. An original dissertation is required, and it must be successfully defended to the examining committee.

All Ph.D. students must meet the University Concentrated Learning Requirement. They must take Historical Research (401). Students who enter the Ph.D. program with an M.A. from another university also must take either Readings in the History of the Atlantic World (HIST 404) or Readings in the History of Industrial America (HIST 405).
