

Joint International Relations and Economics Major

This major combines international economics, which is the study of markets and economic policy, with international political economy, which studies international institutions and the interactions of states with those institutions and each other, motivated by trade-offs among economic goals and considerations of power, national security, and citizen welfare. Study of economic theory, as well as institutional arrangements, allows students to understand consequences for the world economy, including political and distributional consequences.

Program Advisors:

Professor Dinissa Duvanova, International Relations Department,
Professor Mary Anne Madeira, International Relations Department,
Professor Frank R. Gunter, Economics Department
