

## Graduate Study and Research

Lehigh began awarding graduate degrees in 1882. The first recipient, T.H. Hardcastle, of the Class of 1880, wrote his thesis on Alexander Pope, entitled it *The Rights of Man*, and read it aloud at commencement in June 1882.

The first Ph.D. was granted in 1893 to Joseph W. Richards, Class of 1886. Richards, who had a background in metallurgy and electrochemistry, taught at Lehigh until his death in 1921.

Women were admitted to the graduate program in 1918 when the faculty and the board of trustees agreed to grant the degrees of M.A. and M.S. to women, provided they attended classes in the late afternoon and on Saturdays "so that the general character of campus life shall not be affected." Three women received graduate degrees in 1921, the first women to complete graduate work at Lehigh. In 1929, the rule was changed, and women were admitted on much the same basis as men.

In 1936, the Graduate School was established to administer the graduate program. The Ph.D., which was temporarily discontinued in 1894, was reinstated in nine departments: chemistry, chemical engineering, civil engineering, geology, history, mathematics, mechanical engineering, metallurgical engineering, and physics. Tomlinson Fort, professor of mathematics, was selected in 1938 as the first dean of the Graduate School.

In 1995, graduate programs were decentralized and are now administered by the four colleges of the university, as described below.

### COLLEGE OF ARTS AND SCIENCES

Donald Hall, dean

Dominic Packer, associate dean for research and graduate programs

The College of Arts and Sciences offers graduate degrees in the humanities, social sciences, mathematics, and natural sciences. The master of arts, master of science, and the doctor of philosophy degrees are given in most of the traditional academic departments and in some interdisciplinary programs. Advanced degrees may be obtained in the departments of biological sciences, chemistry, earth and environmental sciences, english, history, mathematics, physics, political science, psychology, and sociology. In addition, interdisciplinary degrees are available in American studies, environmental policy design, photonics, and polymer science and engineering.

Although degree requirements vary from department to department, most require a combination of formal coursework and independent research. Students work closely with a faculty adviser in formulating and carrying out their research programs. Students admitted to a traditional department who are interested in an interdisciplinary approach may design a program of study and research which draws on faculty and facilities in other areas of the college or university.

For the most up to date information, interested students should check the CAS graduate website (<http://cas.lehigh.edu/grad>) or contact the Office of Research and Graduate Programs, College of Arts and Sciences, 9 West Packer Ave., Bethlehem, PA. 18015, 610-758-4281 or email to [incasgrd@lehigh.edu](mailto:incasgrd@lehigh.edu).

### COLLEGE OF BUSINESS AND ECONOMICS

Georgette Chapman Phillips, Dean

Andrew J. Ward, Associate Dean

The College of Business and Economics offers the master of science degree in accounting and information analysis; master of science degree in economics; master of science degree in management; master of business administration with concentrations in business administration, corporate entrepreneurship, finance, marketing, international business, project management and supply chain management; and the doctor of philosophy degree in business and economics. In addition, the College of Business and Economics and the P.C. Rossin College of Engineering and Applied Science offer the MBA and Engineering. Students in this program will have the opportunity to concentrate in both a business area and an engineering area during their studies. The College of Education and the College

of Business and Economics offer a joint masters degree in MBA and Educational Leadership, which will develop skills in business disciplines and prepare educators for roles in school administration. The College of Business and Economics, the P.C. Rossin College of Engineering and Applied Science, and the College of Arts and Sciences offer a master of science degree in analytical finance, which provides a strong education in advanced finance and quantitative financial analysis tools. Students will be prepared to create innovative solutions for real financial problems using state of the art analytical techniques and computing technology.

There are five departments in the college: Accounting, Economics, Perella Department of Finance, Management, and Marketing. More information about the various degree programs appears below. Information on the college's graduate programs may be obtained at [www.lehigh.edu/business](http://www.lehigh.edu/business) or by contacting the College of Business and Economics, Graduate Programs Office, Rauch Business Center, 621 Taylor Street, Bethlehem, Pa. 18015, 610-758-4450.

### COLLEGE OF EDUCATION

Gary M. Sasso, Ph.D., Dean

Thomas C. Hammond, Ph.D., Associate Dean

The College of Education is a nationally recognized graduate college. Our distinction resides in our ability to function as a community of scholars and teachers. The diversity of our partnerships, the quality of our research and teaching, and the invigorating and supportive learning environment distinguish us as leaders among graduate colleges of education.

The College of Education offers a master of arts in education, a master of education, a master of science in education, the educational specialist, a joint master in business administration/master of education, post-baccalaureate certificates in various concentrations, the doctor of education, and the doctor of philosophy. There are six academic programs within the college including: Comparative and International Education, Counseling Psychology, Educational Leadership, School Psychology, Special Education, and Teaching, Learning and Technology. The focus of these programs is to prepare students for leadership roles in groundbreaking, cross-disciplinary inquiry that shapes educational practices nationally and internationally. While the College of Education does prepare individuals for leadership roles in school systems, we also prepare individuals for a variety of positions in business and industry, healthcare, private practice, and community-based organizations. We embrace the philosophy that a top quality education should provide the instruction, resources, and experience necessary to create a new type of educator; one who understands the nature of learning, social equity and cultural diversity; values collaboration and teamwork; and embraces societal challenges.

In addition to these six core academic programs, there are four other units within the College of Education:

#### Centennial School

The College of Education operates the Centennial School, a laboratory facility for children with emotional/behavior disorders that has both an elementary and a secondary component. Centennial School provides research opportunities, as well as practical experience, for advanced students in our counseling psychology, educational leadership, school psychology, and teacher-preparation programs. [centennial.coe.lehigh.edu/](http://centennial.coe.lehigh.edu/)

#### The Center for Developing Urban Educational Leaders (CDUEL)

The mission of the CDUEL is to cultivate transformational educational leadership in urban communities by conducting research, developing leadership competencies, and improving leadership practice that enhance student learning and development. The center is committed to leaders who support education at all levels of a community, including teachers, principals, parents and human service workers. Special emphasis is placed on work involving small to midsized urban communities. <http://coe.lehigh.edu/cduel>

**The Center for Promoting Research to Practice**

The center's mission is to generate new knowledge that will truly impact the lives of individuals with disabilities. The primary objective of the center is to create a living laboratory that establishes partnerships with schools, parents and families, and community service providers to enhance the use of best practices for individuals with disabilities. [coe.lehigh.edu/cprp](http://coe.lehigh.edu/cprp)

**Global Online Graduate Degrees and Training Office**

The Office of Global Online Graduate Degrees and Training provides online graduate education and training to students within Lehigh University's College of Education. The Global Online Office's international initiatives are designed specifically for international educators in the U.S. and worldwide. Offering graduate degree programs, principal certification, professional education certificates, and summer institutes via online courses and in-person throughout the academic year, the Global Online Office works with College of Education faculty to provide customized professional development programs at international schools worldwide. For more information, visit: [coe.lehigh.edu/international](http://coe.lehigh.edu/international)

Information on the various degree programs can be obtained by contacting the College of Education, 111 Research Dr., Bethlehem, PA 18015, 610-758-3231 or visiting our website: [coe.lehigh.edu/](http://coe.lehigh.edu/).

**P.C. ROSSIN COLLEGE OF ENGINEERING AND APPLIED SCIENCE**

Stephen P. DeWeerth, dean

John P. Coulter, associate dean for graduate studies and research

There are seven academic departments within the P.C. Rossin College of Engineering and Applied Science: chemical and biomolecular engineering, civil and environmental engineering, computer science and engineering, electrical and computer engineering, industrial and systems engineering, materials science and engineering, and mechanical engineering and mechanics. Master of science and doctor of philosophy degrees are available in each of these departments, as well as in bioengineering, computational and engineering mechanics, environmental engineering, computer engineering, structural engineering, and polymer science and engineering. In addition, master of science programs are provided in analytical finance, management science and engineering, manufacturing systems engineering, photonics, and wireless and networking engineering. Master of engineering degrees are offered in biological chemical engineering, chemical engineering, chemical energy engineering, civil engineering, computer engineering, computer science, electrical engineering, energy systems engineering, environmental engineering, healthcare systems engineering, industrial and systems engineering, management science and engineering, materials science and engineering, mechanical engineering, polymer science and engineering, structural engineering and technical entrepreneurship. In Cooperation with the College of Business and Economics, students can also pursue a Master of Business Administration and Engineering (MBA&E) degree. Certificate programs are available in the areas of healthcare systems engineering, management science and engineering, manufacturing systems engineering, nanotechnology, polymer science and engineering and quality engineering.

Graduate study in the P.C. Rossin College of Engineering and Applied Science is most often related to the college's extensive research activity, and graduate students are expected to engage in analytical or experimental research as part of their programs of study. This activity involves students in the process of creating new knowledge under the direction of the college's distinguished faculty and brings them into contact with some of the most modern and advanced experimental techniques. Many college research programs are supported by contracts, fellowships, and grants from industry and from federal, state, and local governments. This funding not only provides financial support for outstanding students but also allows them to deal with some of the more complex and pressing problems facing our society in the 21st century.

Many faculty members and graduate students in the P.C. Rossin College of Engineering and Applied Science are associated with interdisciplinary research centers and institutes as well as with their own departments. The opportunity for interdisciplinary study allows

them to cross departmental lines in specific technological areas and to work with faculty and graduate students from other departments. Centers and institutes perform research that fall under five broad categories: materials and nanotechnology, infrastructural systems, applied life science and bioengineering, energy and the environment, and complex engineering systems. Information on individual centers and specific research activities can be found at URL [www.lehigh.edu/engineering/research/centers/](http://www.lehigh.edu/engineering/research/centers/). Extensive research in many of these areas is also conducted within academic departments.

Further information on the graduate programs may be obtained through the Office of Graduate Studies and Research, P.C. Rossin College of Engineering and Applied Science, 19 Memorial Drive West, Bethlehem, PA 18015.
