Curricular Flexibility

Choice is a regular part of university life, and encompasses the determination of a college and major, the selection of courses each term, and the development of life goals and career options.

Many of these choices are academic in nature. The undergraduate curricula are flexible, designed to accommodate the changing interests and needs of students. Boundaries between colleges are fluid, providing many options in an educational program. For instance, students may take a bachelor of science (B.S.) degree in the College of Business and Economics or the College of Engineering and Applied Science with a minor in journalism in the College of Arts and Sciences. There are five-year programs for which degrees are awarded in two colleges.

Students who wish to transfer from one undergraduate college to another may do so provided that they have achieved sophomore status and have completed at least 12 credits while in their college of matriculation. Students on academic probation may transfer between colleges with the permission of the committee on standing of students. In addition, each receiving college may require the completion (with a minimum grade of C-) of no more than three introductory courses – courses without prerequisites – before transfer occurs. Students considering such a transfer must confer with their advisers to begin the process. Students who transfer to another college may require more than the traditional eight semesters to complete the course sequence in their degree program.

The College of Business and Economics requires a student to successfully complete either MATH 081 or MATH 021, and ECO 001 before transferring to that college. Courses considered equivalent to these courses will also satisfy the requirement such as approved transfer credit (including AP courses) for these courses taken at other institutions, or the successful completion of MATH 075 and MATH 076, or MATH 031, which are equivalent to MATH 021.
