Accounting

The Department of Accounting provides a variety of courses to support the College of Business core requirements and to provide an undergraduate major.

The mission of Lehigh University's Accounting Department is to provide outstanding accounting education and networking opportunities that prepare students (1) to enter the accounting profession upon graduation, (2) to assume positions of leadership in the global business community later in their careers, and (3) to be socially responsible and ethical business professionals. We will also advance the profession of accountancy globally to serve the public interest by producing and disseminating original accounting research and cross-disciplinary scholarship. We are guided by the missions of Lehigh University and the College of Business. The Accounting Department continuously seeks to be recognized as one of a select group of programs in the United States where an educational experience of the highest possible quality is obtainable.

Within the undergraduate accounting major, students explore and prepare for various career opportunities within the broad field of accounting: Public Accounting Assurance and Tax Services, Financial Services and Corporate Accounting, and Information Systems. The Accounting Program recognizes the learning objectives set forth by the College of Business as an integral part of the curriculum, as well as the importance of providing students with a strong foundation in liberal arts, humanities, and science as set out in the College of Business core curriculum. In addition to the College of Business core curriculum, the accounting curriculum is designed to foster the following learning objectives:

- Preparing and understanding general purpose financial statements for parties outside the firm.
- Using accounting information for decision-making inside the firm.
- Understanding the information systems governing the flow of and control over financial information inside the firm.

To the extent that the above objectives are achieved, Accounting graduates will be well-prepared for positions in public accounting, industry, not-for-profit organizations, and graduate school. Although preparation for professional examinations is not a primary objective, graduates will have the background to take professional examinations in accounting.

THE ACCOUNTING MAJOR

The undergraduate program in accounting is accredited by AACSB International. This achievement places the program within a small group of schools which have satisfied a rigorous examination of the program, faculty, and students that extend beyond the accreditation standards applied to the entire College of Business undergraduate and graduate programs.

Sophomore Prerequisites to the Major

Financial Services and Corporate Accounting

This concentration may appeal to students seeking accounting positions at financial services firms and industrial corporations. For some time representatives from these companies have sought Lehigh students with a strong accounting background. External constituencies suggest that a dose of finance will strengthen these students and make them even more attractive.

Information Technology

Public accounting firms seek graduates for the rapidly growing area of global risk management (GRM). Students entering GRM will be responsible for assessing accounting system and computer risks that impact the financial statements of the organization and for evaluating internal controls in place to minimize such risks. Their findings become an important element in the conduct of the financial audit. This new career path thus requires students who possess strong systems skills and an understanding of financial accounting, management accounting, and auditing. Taxes and advanced financial accounting topics are less important in this setting. Therefore, the following courses comprise this concentration.

Course descriptions for the College of Business graduate courses can be found under Business Graduate courses (http://catalog.lehigh.edu/coursesprogramsandcurricula/businessandeconomics/businesseconomicsgraduatecourses/).

Courses

ACCT 001 Segal Accounting Distinguished Speaker Series 1 Credit

The Segal Accounting Distinguished Speaker Series introduces students to current accounting issues from the perspectives of distinguished thought leaders in the accounting profession. Students will have the opportunity to network with prominent accounting professionals who are leaders in public accounting firms, industry, government, regulatory bodies, and non-profit organizations. This course is open to all accounting majors as well as first- and second-year College of Business students who are interested in exploring career opportunities in accounting.

Repeat Status: Course may be repeated.

ACCT 108 Fundamentals of Accounting 3 Credits

A one-semester survey of accounting principles and practices designed for those students which includes an introduction to industrial cost systems designed for those non College of Business students planning to take only one accounting course. Other students should take the Acct 151-152 sequence.
Prerequisites: ACCT 315

ACCT 315 Introduction to Financial Accounting 3 Credits
The organization, measurement and interpretation of economic information. Introduction to accounting theory, concepts and principles, the accounting cycle, information processing, and financial statements. Exposure to controversial issues concerning income determination and valuation. Must have sophomore standing.

ACCT 316 Intermediate Accounting I 3 Credits
Intensive study of the basic concepts and principles of financial accounting, emphasizing the problems of fair presentation of an entity’s financial position, operating results and cash flows. Understanding of the conceptual framework of accounting, review of the accounting process, and recognition, measurement, valuation and disclosure of current assets, fixed assets, and intangibles. Problem-solving skills and critical analysis are stressed.
Prerequisites: ACCT 152 and BIS 111

ACCT 317 Intermediate Accounting II 3 Credits
The sequel to Accounting 315, this course continues with intensive study of recognition, measurement, valuation and disclosure issues relating to such topics as investments, liabilities, leases, pensions, income-taxes, share-based payments, revenue issues, earnings per share, and complexities related to the statement of changes in financial position. Analysis and interpretation of financial statements and problem-solving skills are integral parts of the course.
Prerequisites: ACCT 315

ACCT 318 Advanced Financial Accounting 3 Credits
A study of specialized topics in financial accounting, including partnership accounting, business combinations and consolidated financial statements, segment and interim reporting, foreign currency transactions and translation, and accounting and reporting for governmental and other nonprofit organizations. Involves considerable problem-solving and critical evaluation of controversial theoretical issues.
Prerequisites: ACCT 316

ACCT 319 Analysis of Financial Statements 3 Credits
This course uses financial statement information to analyze companies’ profitability and risk. Understanding the form, content and relationships among the financial statements is integrated with the use of ratios and analytic adjustments to augment the information in published financial reports. Current developments, business strategies and off-balance-sheet financing are linked to assessments of companies’ performance. Case studies, team projects and presentations involve actual companies, financial statements. Open only to graduating seniors.
Prerequisites: ACCT 316
Can be taken Concurrently: ACCT 316

ACCT 320 Fundamentals of Auditing 3 Credits
An introduction to auditing theory, objectives, and practices related largely to the responsibilities of independent professional accountants. The auditing environment, generally accepted auditing standards, internal control theory, and reporting alternatives are considered. Exposure to operational auditing is provided.
Prerequisites: (ACCT 311 or CSB 311) and (ACCT 315)

ACCT 321 Cost Accounting 3 Credits
An introductory study of the concepts and techniques of cost accounting, including budgeting, cost/volume/pricing analysis, performance, and opportunities for planning are emphasized. Problem-solving using the source materials of tax law and tax research are important components of the course.
Prerequisites: ACCT 315

ACCT 324 Cost Accounting 3 Credits
An in-depth study of cost concepts appropriate for product costing in a manufacturing operation, planning and controlling routine operations, and nonroutine decision-making. Topics include job order and process costing, joint and by-products, cost allocation, budgeting, standard costing, direct costing, cost-volume-profit analysis, and relevant costs for decisions.
Prerequisites: ACCT 152

ACCT 330 Accounting Data and Analytics 3 Credits
An introduction to auditing theory, objectives, and practices related largely to the responsibilities of independent professional accountants. The auditing environment, generally accepted auditing standards, internal control theory, and reporting alternatives are considered. Exposure to operational auditing is provided.
Prerequisites: (ACCT 311 or CSB 311) and (ACCT 315)

ACCT 331 Accounting Information Systems 3 Credits
An introduction to the concepts underlying information systems as they relate to organizational structure, managerial decision making and accounting. The course acquaints students with the reports and documents generated by information systems, as well as with the procedures and controls employed in a variety of business applications. Students apply these concepts, techniques and procedures to the planning, analysis and design of manual and computer-based information systems.
Prerequisites: ACCT 307

ACCT 332 Fundamental Federal Income Taxation 3 Credits
An introductory study of the principles and concepts of federal income taxation of individuals, corporations, partnerships, and fiduciaries, and the tax treatment of gifts and estates. Determination of taxable income and opportunities for planning are emphasized. Problem-solving and written research are emphasized.
Prerequisites: ACCT 315

ACCT 333 Advanced Federal Income Taxation 3 Credits
An advanced study of the taxation of business organizations, estates, trust, and wealth transfer taxes. Planning and research are the basic components of the course. Problem-solving and written research are emphasized.
Prerequisites: ACCT 307

ACCT 334 Financial Accounting 3 Credits
An introductory study of the principles and concepts of financial accounting theory, concepts and principles, the accounting cycle, information processing, and financial statements. Exposure to controversial issues concerning income determination and valuation. Must have sophomore standing.

ACCT 335 Financial Accounting 3 Credits
The course continues with intensive study of recognition, measurement, valuation and disclosure issues relating to such topics as investments, liabilities, leases, pensions, income-taxes, share-based payments, revenue issues, earnings per share, and complexities related to the statement of changes in financial position. Analysis and interpretation of financial statements and problem-solving skills are integral parts of the course.
Prerequisites: ACCT 315

ACCT 336 Financial Accounting 3 Credits
A study of specialized topics in financial accounting, including partnership accounting, business combinations and consolidated financial statements, segment and interim reporting, foreign currency transactions and translation, and accounting and reporting for governmental and other nonprofit organizations. Involves considerable problem-solving and critical evaluation of controversial theoretical issues.
Prerequisites: ACCT 316

ACCT 337 Financial Accounting 3 Credits
This course uses financial statement information to analyze companies’ profitability and risk. Understanding the form, content and relationships among the financial statements is integrated with the use of ratios and analytic adjustments to augment the information in published financial reports. Current developments, business strategies and off-balance-sheet financing are linked to assessments of companies’ performance. Case studies, team projects and presentations involve actual companies, financial statements. Open only to graduating seniors.
Prerequisites: ACCT 316
Can be taken Concurrently: ACCT 316

ACCT 338 Financial Accounting 3 Credits
An introduction to auditing theory, objectives, and practices related largely to the responsibilities of independent professional accountants. The auditing environment, generally accepted auditing standards, internal control theory, and reporting alternatives are considered. Exposure to operational auditing is provided.
Prerequisites: (ACCT 311 or CSB 311) and (ACCT 315)

ACCT 339 Financial Accounting 3 Credits
An introductory study of the concepts and techniques of cost accounting, including budgeting, cost/volume/pricing analysis, performance, and opportunities for planning are emphasized. Problem-solving using the source materials of tax law and tax research are important components of the course.
Prerequisites: ACCT 315

ACCT 340 Financial Accounting 3 Credits
An in-depth study of cost concepts appropriate for product costing in a manufacturing operation, planning and controlling routine operations, and nonroutine decision-making. Topics include job order and process costing, joint and by-products, cost allocation, budgeting, standard costing, direct costing, cost-volume-profit analysis, and relevant costs for decisions.
Prerequisites: ACCT 152

ACCT 341 Financial Accounting 3 Credits
An introductory study of the principles and concepts of federal income taxation of individuals, corporations, partnerships, and fiduciaries, and the tax treatment of gifts and estates. Determination of taxable income and opportunities for planning are emphasized. Problem-solving and written research are emphasized.
Prerequisites: ACCT 307

ACCT 342 Financial Accounting 3 Credits
An advanced study of the taxation of business organizations, estates, trust, and wealth transfer taxes. Planning and research are the basic components of the course. Problem-solving and written research are emphasized.
Prerequisites: ACCT 307

ACCT 343 Financial Accounting 3 Credits
An introduction to auditing theory, objectives, and practices related largely to the responsibilities of independent professional accountants. The auditing environment, generally accepted auditing standards, internal control theory, and reporting alternatives are considered. Exposure to operational auditing is provided.
Prerequisites: (ACCT 311 or CSB 311) and (ACCT 315)

ACCT 344 Financial Accounting 3 Credits
An introductory study of the concepts underlying information systems as they relate to organizational structure, managerial decision making and accounting. The course acquaints students with the reports and documents generated by information systems, as well as with the procedures and controls employed in a variety of business applications. Students apply these concepts, techniques and procedures to the planning, analysis and design of manual and computer-based information systems.
Prerequisites: ACCT 307

ACCT 345 Financial Accounting 3 Credits
An advanced study of the taxation of business organizations, estates, trust, and wealth transfer taxes. Planning and research are the basic components of the course. Problem-solving and written research are emphasized.
Prerequisites: ACCT 307

ACCT 346 Financial Accounting 3 Credits
An introduction to auditing theory, objectives, and practices related largely to the responsibilities of independent professional accountants. The auditing environment, generally accepted auditing standards, internal control theory, and reporting alternatives are considered. Exposure to operational auditing is provided.
Prerequisites: (ACCT 311 or CSB 311) and (ACCT 315)

ACCT 347 Financial Accounting 3 Credits
An introductory study of the concepts underlying information systems as they relate to organizational structure, managerial decision making and accounting. The course acquaints students with the reports and documents generated by information systems, as well as with the procedures and controls employed in a variety of business applications. Students apply these concepts, techniques and procedures to the planning, analysis and design of manual and computer-based information systems.
Prerequisites: ACCT 307

ACCT 348 Financial Accounting 3 Credits
An advanced study of the taxation of business organizations, estates, trust, and wealth transfer taxes. Planning and research are the basic components of the course. Problem-solving and written research are emphasized.
Prerequisites: ACCT 307

ACCT 349 Financial Accounting 3 Credits
An introduction to auditing theory, objectives, and practices related largely to the responsibilities of independent professional accountants. The auditing environment, generally accepted auditing standards, internal control theory, and reporting alternatives are considered. Exposure to operational auditing is provided.
Prerequisites: (ACCT 311 or CSB 311) and (ACCT 315)

ACCT 350 Financial Accounting 3 Credits
An introductory study of the concepts underlying information systems as they relate to organizational structure, managerial decision making and accounting. The course acquaints students with the reports and documents generated by information systems, as well as with the procedures and controls employed in a variety of business applications. Students apply these concepts, techniques and procedures to the planning, analysis and design of manual and computer-based information systems.
Prerequisites: ACCT 307

ACCT 351 Financial Accounting 3 Credits
An advanced study of the taxation of business organizations, estates, trust, and wealth transfer taxes. Planning and research are the basic components of the course. Problem-solving and written research are emphasized.
Prerequisites: ACCT 307

ACCT 352 Financial Accounting 3 Credits
An introduction to auditing theory, objectives, and practices related largely to the responsibilities of independent professional accountants. The auditing environment, generally accepted auditing standards, internal control theory, and reporting alternatives are considered. Exposure to operational auditing is provided.
Prerequisites: (ACCT 311 or CSB 311) and (ACCT 315)

ACCT 353 Financial Accounting 3 Credits
An introductory study of the concepts underlying information systems as they relate to organizational structure, managerial decision making and accounting. The course acquaints students with the reports and documents generated by information systems, as well as with the procedures and controls employed in a variety of business applications. Students apply these concepts, techniques and procedures to the planning, analysis and design of manual and computer-based information systems.
Prerequisites: ACCT 307

ACCT 354 Financial Accounting 3 Credits
An advanced study of the taxation of business organizations, estates, trust, and wealth transfer taxes. Planning and research are the basic components of the course. Problem-solving and written research are emphasized.
Prerequisites: ACCT 307

ACCT 355 Financial Accounting 3 Credits
An introduction to auditing theory, objectives, and practices related largely to the responsibilities of independent professional accountants. The auditing environment, generally accepted auditing standards, internal control theory, and reporting alternatives are considered. Exposure to operational auditing is provided.
Prerequisites: (ACCT 311 or CSB 311) and (ACCT 315)
ACCT 442 Financial Reporting and Analysis 2 Credits
This course focuses on the organization, measurement, and interpretation of economic information in corporate financial reports. It emphasizes the use and interpretation of the financial statements issued by business organizations. Topics include: accounting concepts and principles, accrual accounting, accounting cycle, revenue, expense, asset, liability and equity accounts. Students are exposed to balance sheet valuation, income determination, cash flow analysis, accounting judgment, profit manipulation, evaluation of earnings quality, and the ethical framework to guide business decisions.

ACCT 444 Accounting for Decision Making 2 Credits
This course emphasizes the organization, measurement and interpretation of internal accounting information that managers use to make business decisions. Students learn techniques such as cost analysis, budgeting, performance evaluation, and employee motivation. Topics include: cost flows in service and manufacturing enterprises; product and process costing; transfer pricing; resource planning, evaluation and control through budgeting, make-or-buy decisions; activity-based costing; standard costing, and variance analyses; pricing and production decision making using cost-volume-profit analysis.
Prerequisites: ACCT 442
