

**MINIMUM HUMANITIES/SOCIAL SCIENCES (HSS) REQUIREMENTS FOR ALL ENGINEERING PROGRAMS****Basic Requirement**

Economics and English. Three courses totaling a minimum of ten credit hours: Students must complete all three:

ECO 001	Principles of Economics	4
WRT 001 or WRT 003	Academic and Analytical Writing Composition and Literature I for Multilingual Writers	3
WRT 002 or WRT 005 or WRT 011	Research and Argument Composition and Literature II for Multilingual Writers Advanced Writing: The Rhetorical Self	3
Note: WRT 011 is only for students with AP credit for WRT 001		

**Total Credits** **10**

**Advanced Requirement**

A minimum of four multi-credit courses and a minimum of 13 credits in courses designated as HU (humanities) or SS (social science), with the following restrictions:

1. Depth: At least eight credits must be in a common discipline and from the same department or program. At least three of these credits must be at the 100-level or above, or at the intermediate level or above for a single modern foreign language.
2. Breadth: At least three credits in a discipline different from, and not cross-listed with, the discipline employed to satisfy the depth requirement.
3. At least three credits must be designated as HU.
4. None of the courses used for HSS can be taken Pass/Fail.
5. None of the course can be one-credit courses.

**FREE ELECTIVES**

The college, through its advisors, is prepared to help students to use the credit hours of "free electives" that, along with other electives in the curriculum, may be used to develop a program of personal interest. Free electives may be satisfied by taking regular course offerings or up to six credit hours from any of the following: MUS 21-79, from JOUR 1-8, or up to six credit hours of advanced ROTC courses.

**BACHELOR'S TO MASTER'S ACCELERATED PROGRAMS**

The Bachelor's to Master's Accelerated Program allows eligible undergraduates to leverage up to 12 credits taken during undergraduate studies towards a master's degree within the Rossin College (or any of Lehigh's colleges). In addition, the accelerated program allows students to enroll in graduate level (400 level) courses during their junior and senior years.

Master's degrees are becoming increasingly common in the workplace, and graduate study allows students to build new skills or expand existing ones. Students may elect to continue in their undergraduate discipline or change fields. For more information, see: <https://engineering.lehigh.edu/academics/undergraduate/special-opportunities/accelerated> (<https://engineering.lehigh.edu/academics/undergraduate/special-opportunities/accelerated/>).

**INTERDISCIPLINARY UNDERGRADUATE DEGREES****Computer science & business Honors program**

The College of Business and the Computer Science and Engineering department in the P.C. Rossin College of Engineering and Applied Science jointly offer the Computer Science and Business (CSB) Honors program. It is a four-year program that is fully accredited by AACSB International, the Association to Advance Collegiate Schools of Business, and by the Computing Accreditation Commission of ABET, <http://www.abet.org>.

**Integrated Business & Engineering Honors Program**

The Integrated Business and Engineering Honors Program (IBE) is offered jointly by the P.C. Rossin College of Engineering and Applied Science and the College of Business. The program recognizes the

need for today's leaders in business and industry to have a sound foundation in both commerce and technology.

After four years and a minimum of 137 credits, students will receive a single Bachelor of Science Degree in Integrated Business and Engineering. The program meets the accreditation standards of the American Assembly of Collegiate Schools of Business. Students are expected to maintain a minimum GPA of 3.25 in order to remain in the program.

A second option is the five-year dual degree program. This option allows students to obtain a second Bachelor of Science degree in engineering by completing course work in the engineering field chosen by the student as their IBE major. Students enrolled in the four year IBE Honors Program and in satisfactory standing are able to transfer to a dual-degree at any time, and stay within the honors program cohort. The additional time necessary to complete the second degree will depend on the curriculum selected, and the number of advanced placement credits. The number of additional credit hours will typically be in the range of 20 to 30.

Students in the IBE Honors Program can major in nearly any area of engineering or business that Lehigh offers. After their freshman year, each student will declare a major in either the P. C. Rossin College of Engineering and Applied Science or the College of Business.

Admission to the Integrated Business and Engineering Program is highly selective, with annual admission limited to approximately 50 students. The University's Office of Admissions can explain the procedure for applying to the program. It is possible that a small number of exceptional students may be admitted to the program following the completion of their freshman year. Admission at this point would be highly competitive and based upon freshman year GPA, faculty recommendations, and space availability.

The Co-Directors of the IBE Honors Program are Ana Alexandrescu, Professor of Practice, Industrial and Systems Engineering ([aia210@lehigh.edu](mailto:aia210@lehigh.edu) ([rhs2@lehigh.edu](mailto:rhs2@lehigh.edu))) and Richard J. Kish, Professor of Finance ([rjk7@lehigh.edu](mailto:rjk7@lehigh.edu) ([sgb2@lehigh.edu](mailto:sgb2@lehigh.edu))). For additional information, see the IBE Honors Program or visit the IBE web site at [www.lehigh.edu/~inibep/inibep.html](http://www.lehigh.edu/~inibep/inibep.html) (<http://www.lehigh.edu/~inibep/inibep.html>).

**Integrated Degree Engineering, Arts and Sciences (IDEAS) Honors Program**

The B.S. in Integrated Engineering, Arts and Sciences (IDEAS) provides students with a unique opportunity to combine the breadth and depth of two focus areas, one from engineering and one from arts and sciences in a four-year experience. More information is available in the IDEAS entry in this catalog, or online at [www.lehigh.edu/ideas](http://www.lehigh.edu/ideas) (<http://www.lehigh.edu/ideas/>).

Jointly administered by the College of Arts and Sciences and the P.C. Rossin College of Engineering and Applied Science, IDEAS is a four-year honors program that allows students to earn a bachelor's degree with concentrations in both colleges. In close collaboration with IDEAS advisors and faculty directors, students admitted to this highly selective honors program develop an individualized academic plan tailored to their interests.

IDEAS allows students to study diverse interests such as bioengineering and religion, computer science and graphic design, industrial engineering and international relations, bioengineering and molecular biology, and music and computer science. Key features of the program include:

- **Rigorous honors program:** Each year, IDEAS accepts 30-40 highly qualified first-year student candidates who have indicated an interest in the program. Students must maintain a 3.25 grade point average to continue.
- **Team-based and individual projects:** Each student builds toward a capstone research project and thesis in their senior year, developed through a combination of team-based and individualized instruction.
- **Communication as key to bridging disciplines:** IDEAS courses are writing-intensive and presentation-oriented. Participation in the program substitutes for some first-year courses in both colleges.

IDEAS graduates are awarded a Bachelor of Science degree, conferred by both colleges. Students interested in pursuing a professionally accredited degree in their selected engineering disciplines may choose to do so in an optional fifth year of study. Some programs of study in the College of Arts and Sciences, mainly in the sciences, may also require further study to complete certification.

### OTHER OPTIONS FOR ENGINEERING STUDENTS

#### Professional work experience

Internships and other professional work experiences are available for undergraduates in the P.C. Rossin College of Engineering and Applied Science. Students interested in experiential employment opportunities should contact the Center for Career and Professional Development and their academic advisor. Students earn free elective credits per successful work assignment for a total of six free elective credits. These six credits are in ENGR 200 (<http://catalog.lehigh.edu/coursesprogramsandcurricula/engineeringandappliedscience/engineering/>) or ENGR 160 and are taken as P/F (Pass/Fail).

Technical minors (Available to all students but most require prerequisites from engineering curricula).

Minor Program	Department
Aerospace Engineering	Mechanical Engineering
Biotechnology	Chemical & Biomolecular Engineering
Chemical Engineering	Chemical & Biomolecular Engineering
Computer Engineering	Electrical & Computer Engineering
Computer Science	Computer Science & Engineering
Data Science	Computer Science & Engineering
Electrical Engineering	Electrical & Computer Engineering
Engineering Leadership	Industrial & Systems Engineering
Energy Engineering	Mechanical Engineering
Environmental Engineering	Civil & Environmental Engineering
Manufacturing Systems	Industrial & Systems Engineering
Materials Science	Materials Science & Engineering
Nanotechnology	Materials Science & Engineering
Polymer Science	Materials Science & Engineering

#### Interdisciplinary Minors (For engineering students)

A minor in Engineering Leadership provides students with knowledge, experiences and interaction with successful business managers in order to become more effective leaders. For more information about this minor: <http://www.lehigh.edu/~inleader/curriculum.html>

The College of Business offers a minor in Business for students in the College of Arts and Sciences and P.C. Rossin College of Engineering and Applied Science to provide students with knowledge and skills to allow them to make informed business decisions. A sequential sequence of courses is designed to integrate such traditional topics as accounting, finance, marketing, and management. For more information about his minor: <http://cbe.lehigh.edu/academics/undergraduate/degree-programs/business-minor> (<http://cbe.lehigh.edu/academics/undergraduate/degree-programs/business-minor/>) . There is a minor in Real Estate: <http://cbe.lehigh.edu/academics/undergraduate/degree-programs/real-estate-minor> (<http://cbe.lehigh.edu/academics/undergraduate/degree-programs/real-estate-minor/>) and a minor in Entrepreneurship: <http://cbe.lehigh.edu/academics/undergraduate/degree-programs/entrepreneurship-minor> (<http://cbe.lehigh.edu/academics/undergraduate/degree-programs/entrepreneurship-minor/>) . The courses in the latter treat subjects such as intellectual property, creativity and innovation, venture capital, positioning of products and services, and understanding the entrepreneurial mindset. There is also a minor in Supply Chain Management. Details can be found at <http://catalog.lehigh.edu/coursesprogramsandcurricula/businessandeconomics/supplychainmanagement/#undergraduatetext>

Students in engineering can also earn a minor in various humanities or social sciences by using their humanities and social science electives coupled with their free electives.

#### Engineering Minor (for non-engineering students)

The College of Engineering enables undergraduate students enrolled in the Colleges of Arts and Sciences and in the College of Business to earn a minor in engineering. This unique program provides students with insight into the world of engineers: who they are, what they do, and how they think. Students pursuing the Engineering Minor develop an understanding of the tools and techniques engineering use on a day-to-day basis.

The mission of the minor is to educate non-engineering students about engineering methodology, specifically how engineers solve problems; how they design, manufacture, and analyze problems; and how other factors such as economics, safety, ethics, and environmental issues affect the engineering design process. Fifteen credit hours of required and elective coursework are required to fulfill the engineering minor.

#### Music Option

Music and Engineering is not a major in itself. However, Lehigh attracts many engineering and science students who wish to continue their active involvement in music and the music department. For those students who are interested in pursuing this option, music can be taken as a second degree, minor or through free electives.

#### Undergraduate research through Centers and Institutes

Faculty and students in the college also have research and scholarship activities in a number of centers and institutes, where graduate and undergraduate students work closely with faculty members.
