

Media Services

Library and Technology Services offers an extensive media collection and streaming video services for courses. Videos and DVDs are available for viewing and for short-term loan at the Fairchild-Martindale Library.

The Digital Scholarship Team is part of the Library & Technology Services Center for Innovation in Teaching and Learning. The team works with faculty and students in the use of digital tools and technologies that will enable them to develop and/or disseminate their course work and research. Examples of work include documentary audio and video, web publication, and spatial and data visualization.

In addition to the staff offices located in the 5th floor of Fairchild Martindale Library, team members also man and provide services in the Digital Media Studio, located in room 425 of the Library. The Studio houses resources for professional audio and video recording and a Mac computer lab equipped with basic and advanced video editing and design software. The lab also loans video, audio, and photography equipment.
